2. CITATIONS AND EXPLANATIONS

Claims 1-23 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest an apparatus for inducing phase separation in a pharmaceutical grade cell lysate comprising a conduit comprising a cell lysate solution in fluid communication with a gas port through which a gas is forced under pressure into the conduit comprising the cell lysate solution thereby controllably forming bubbles in the cell lysate solution. Furthermore, the prior art does not teach or fairly suggest an apparatus for pharmaceutical grade bacterial lysis comprising a fluid flow path comprising and in fluid communication with: a cell lysis buffer conduit, a cell suspension conduit, a precipitation buffer conduit, and a gas introduction port comprising a plurality of pores for controllably inducing a stream of bubbles into the fluid flow path.

Claims 1-23 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
